Sterile supplies for your surgery/clinic

Instrument preparation and sterilisation by experts

Central sterile supplies is one of the most important and most sensitive areas of a surgery or clinic and requires the highest level of hygiene, precision and reliability.

Incorrectly prepared and sterilised medical products endanger the health of both patients and staff.

We are experts in providing the highest levels of quality and safety. We aim to impress you with our services. We will not disappoint you.

Our equipment includes:

- 5 cleaning, disinfection and drying systems
- A container washing system
- 2 steam sterilisation units
- A plasma sterilisation device for thermolabile items
- Integrated computer workspaces

We can do a lot. Ask us.

Processes:

- Ensuring sterile supplies at customers` demands
- Recording and managing your instruments using EDP
- Preparing, checking and maintaining instruments using validated procedures
- Comprehensive traceability

We process up to 40,000 sterilisation units every year. Careful examination, functional testing and care of surgical instruments by our qualified staff allows for continued high durability of these units for many years to come. This is how we guarantee consistently high quality in our work.

We work according to validated procedures. Certification in accordance with DIN EN ISO 9001 and DIN EN ISO 13485 and the provisions of the medical products directive form the basis of our work.

Medical products

Manufacturer of medical treatment units/ packager of medical products

We produce disposable surgical instruments, treatment units for surgical use, and first aid and operation units.

Validated cleaning of stainless steel instruments in our cleaning and disinfection systems and packaging of the treatment units takes place in controlled areas.

Class 8 cleanroom, in accordance with DIN EN ISO 14644-1

In a modern cleanroom that conforms to ISO class 8 standard, we finish, assemble and package medical products in a particle-free, germ-free environment in line with customer specifications.

We have been working in this field for many years. Our clients include renowned international companies active in the production of pharmaceutical and medical products.

Certification in accordance with DIN EN ISO 9001 and DIN EN ISO 13485 and the provisions of the medical products directive (MDD) form the basis of our work.
